

CARLOS CAÑIZARES

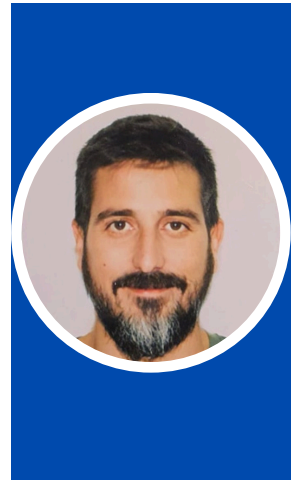

SENIOR SOFTWARE ENGINEER

+34 600 85 37 99
carlos.canizares.work@gmail.com

Full Stack Developer with 20 years of experience designing and building scalable, high-performance web and mobile applications using .NET Core, Node.js (Typescript), and JavaScript frameworks.

Strong expertise in AWS, Azure and GC, CI/CD, and containerized deployments. Passionate about clean code, data-driven architecture, and agile collaboration.

Recently adopting AI agents to boost productivity and enhance quality of what I deliver.

Personal Details

Location:

Barcelona, Spain

Technical Skills

- **Languages:** C#, JavaScript, TypeScript, SQL, Python (recently adopted)
- **Web/Backend:** React, Angular, .NET Core, Node.js (Typescript), REST APIs, Kafka, ElasticSearch
- **Mobile:** React Native, published to android & iOS markets a couple of apps along career.
- **Cloud & DevOps:** AWS, Azure, GC, Docker, Terraform, Helm, GitHub Actions, Azure DevOps
- **Observability:** Datadog, Splunk, Kibana, Grafana
- **Databases:** SQL Server, MongoDB, PostgreSQL
- **Practices:** TDD, Clean Architecture, CI/CD
- **Other Tools:** Power Automate, Power BI, Open AI Api (mcp tools, agents, conversational api, vector files/rag strategy), Codex, Copilot, Antigravity

Professional Experience

Gartner — Senior Full Stack Engineer (Nov 2021 – Dic 2025, Remote)

Develop and maintain scalable internal tools and services. Design and optimize high-throughput data pipelines using Kafka. Integrate third-party services to enrich content insights. Created recommendation engine app working close with moderation team (whether review is fake or real and it's content it's appropriate to be published).

Stack: .NET Core, Node.js Typescript, React, AWS, PostgreSQL, Kafka, ElasticSearch, Python

Engloba Tech — CTO (2019 – 2021, Barcelona)

Led development of internal products and modernization initiatives. Built HGTag mobile app with React Native and .NET Core micro services. Standardized CI/CD and introduced DDD/TDD practices. Delivered Power BI training and integrated ML insights into dashboards.

Stack: .NET Core, React Native, React, Azure, Kubernetes, Identity Server, SQL Server

Plain Concepts — Senior Full Stack Engineer (2018 – 2019, Barcelona)

Delivered multiple client projects, serving as technical lead. Developed SPA apps and .NET Core APIs; automated deployments.

Participated in community events for Microsoft and azure technologies as speaker and implementing a couple of workshops.

Stack: React, Angular, .NET Core, Azure Functions, SQL Server, Azure DevOps

Haufe Group — Senior Full Stack Engineer (2017 – 2018, Barcelona)

I was part of a 4 flat full stack team that developed onboarding & mobile solutions for Haufe, using React Native and Node.js. Managed Azure Kubernetes and MongoDB infrastructure. Supported cloud adoption strategy.

Stack: React Native, Node.js, React, Azure, Kubernetes, MongoDB, CI/CD

Diagonal Gest / Ancert – Developer -> Analyst -> Coordination / Product Owner (2005 – 2017)

Evolved through multiple roles including developer, analyst and team coordinator over a 10-year tenure. Along this period at diagonal Gest I led modernization initiative migrating codebase to .NET ecosystem (WCF, WPF, WebForms, and eventually MVC).

In 2015 joined Ancert as Product Owner for AGN product financial module. Led 4-person engineering team developing desktop applications for the notarial sector.

Stack: .NET, SQL Server, WCF, WPF, ASP.NET MVC, Javascript

Education & Languages

Technical Engineering in Management — UOC (2005 –)

CFGS – Software Development — Educem (2002 – 2004)

CFGS – IT Systems Administration — Educem (2004 – 2005)

Languages

Spanish (Native)

Catalan (Native)

English (B2)
