

CARLOS CAÑIZARES

SENIOR SOFTWARE ENGINEER

+34 600 85 37 99
carlos.canizares.work@gmail.com

Full Stack Developer with 20 years of experience designing and building scalable, high-performance web and mobile applications using .NET Core, Node.js (Typescript), and JavaScript frameworks.

Strong expertise in AWS, Azure and GC, CI/CD, and containerized deployments. Passionate about clean code, data-driven architecture, and agile collaboration.

I use AI agents to boost productivity and enhance quality of what I deliver.

Personal Details

Location:

Barcelona, Spain

Email:

Technical Skills

- **Languages:** C#, JavaScript, TypeScript, SQL, Python (recently adopted)
- **Web/Backend:** React, Angular, .NET Core, Node.js (Typescript), REST APIs, Kafka, ElasticSearch
- **Mobile:** React Native, published to android & iOS markets a couple of apps along career.
- **Cloud & DevOps:** AWS, Azure, GC, Docker, Terraform, Helm, GitHub Actions, Azure DevOps
- **Observability:** Datadog, Splunk, Kibana, Grafana
- **Databases:** SQL Server, MongoDB, PostgreSQL
- **Practices:** TDD, Clean Architecture, CI/CD
- **Other Tools:** Power Automate, Power BI, Open AI Api (mcp tools, agents, conversational api, vector files/rag strategy), Codex, Copilot, Antigravity.

Professional Experience

Gartner — Senior Full Stack Engineer (Nov 2021 – Dic 2025, Remote)

Projects & Role

GDM reviews platform is composed of four brands/sites: GetApp, Software Advice, Capterra, Upcity.

Senior Full Stack Engineer in a 12 person **multi national team** main role of our team was to architect and maintain high-throughput event-driven systems **processing millions of customer reviews** across Gartner's global platforms.

Achievements

Worked very close with Moderation team leaders in order to build recommendation engine. The engine was composed of third-party services for content moderation, sentiment analysis, and fraud detection to ensure review authenticity and quality.

Got a promotion in 2024 from Senior to Senior Advanced (similar to lead)

Stack: .NET Core, Node.js Typescript, React, AWS, PostgreSQL, Kafka, ElasticSearch, Python

Engloba Tech — CTO (2019 – 2021, Barcelona/Remote)

Projects & Role

Delivered multiple projects for different clients and sectors. We started from scratch. This is my closer experience to an startup. **Led technical strategy** and engineering teams across multiple client projects, delivering cloud-native applications on Azure infrastructure..

Achievements

Architected, **implemented from scratch and launched HGTAG mobile application using React Native** and .NET Core that was successfully published to iOS App Store and Google Play.

Team grew from 3 to 8 engineers during my tenure.

Stack: .NET Core, React Native, React, Azure, Kubernetes, Identity Server, SQL Server

Plain Concepts — Senior Full Stack Engineer (2018 – 2019, Barcelona)

Projects & Role

Delivered multiple client projects, visiting client offices every iteration to show progress and get new priorities for the team. Developed SPA apps and .NET Core APIs; automated deployments.

Achievements

Participated in community events for Microsoft and azure technologies as speaker and implementing a couple of workshops.

Stack: React, Angular, .NET Core, Azure Functions, SQL Server, Azure DevOps

Haufe Group — Senior Full Stack Engineer (2017 – 2018, Barcelona/Remote)

Projects & Role

I was part of a 4 flat full stack team that developed onboarding & mobile solutions for Haufe, using React Native and Node.js. **Managed Azure Kubernetes and MongoDB infrastructure.** Supported cloud adoption strategy.

Achievements

Released first draft of the product on my period here.

Stack: React Native, Node.js, React, Azure, Kubernetes, MongoDB, CI/CD

Ancert – Developer –> Analyst –> Coordination / Product Owner (2015 – 2017)

Projects & Role

AGN, desktop app build with WPF and Java Web Services (SOAP), specific for notaries. **Led 4-person engineering team** developing desktop applications for the notarial sector, **serving as Product Owner** of the financial module of the app.

Achievements

After deep dive analysis I was able to detect big amount of unnecessary request/response between client and server, that were making the app perform slow. After this analysis and posterior work with the eng team we were able to reduce time loading and **increase significantly performance on the app**.

Stack: .NET, SQL Server, WCF, WPF, ASP.NET MVC, Javascript

Diagonal Gest - Developer -> Analyst -> Coordination (2005 - 2017)

Projects & Role

Custom desktop and web applications all related with mortgage market and real state in general. Evolved through multiple roles including developer, functional analyst, and team coordinator over a transformative 10-year tenure.

Achievements

Led modernization initiative migrating legacy codebase to .NET ecosystem (WCF, WPF, WebForms, and eventually MVC).

Grew team from solo developer + IT Director to 10-member organization, establishing development best practices and technical culture.

Education & Languages

Technical Engineering in Management — UOC (2005 -)

CFGS — Software Development — Educem (2002 - 2004)

CFGS — IT Systems Administration — Educem (2004 - 2005)

Languages

Spanish/Catalan - Native

English - B2, professional working proficiency
